United States Experimental Pieces.

The following sixteen lots form a set of all the regular coinage of the United States Mint for the year 1868. Six sets only were struck in aluminum, a number of them for presentation to foreign governments. The set herein catalogued was purchased at the sale of the Fewsmith Cabinet, October 4, 1870, and is now separated, at request of the owner, to enable collectors to obtain single specimens of United States coins struck in the new and beautiful metal—aluminum.* Each piece is sharp and in beautiful condition.

703 1868; Double Eagle or Twenty Dollar Piece; aluminum; brilliant proof. Passed

*Aluminum is a very light but hard metal, and has a ring resembling that of glass. In value it is equal to silver.

Passed

704 1868; Eagle or Ten Dollar Piece; aluminum; brilliant proof.
